

User Manual

Rotana Spa Management System — operator guide.

1. About this manual

This manual explains, step by step, how spa, gym and front-desk staff use the system every day. It is written for:

- **Reception / front desk** — check-ins, registrations, appointments, service orders.
- **Therapists & trainers** — treatment and class workflows.
- **Managers & admins** — reports, users, roles, settings.

2. Getting started

2.1 Signing in

1. Open the system URL in Chrome, Edge or Firefox.
2. Enter your **email** and **password**.
3. Click **Sign In**.

Demo accounts (change passwords on first real use):

- Company admin: `admin@rotanaspa.com` / `admin123`
- Super admin: `super@rotanaspa.com` / `admin123`

2.2 The dashboard

After signing in you land on the **Dashboard**:

- **Quick actions** at the top: New Visit, New Booking, Register Member, Service Orders.
- **Spa Quick Stats**: Total Members, Today's Visits, In Treatment, Draft Orders.
- **Recent Members** list.
- The left **sidebar** groups all pages by module. You only see the groups your role allows.

2.3 Switching language

Use the **language switcher** (English / Amharic) on the login screen to change the interface language.

3. The visit — service-order workflow (core daily flow)

This is the most important workflow. It takes a customer from the front door to the cashier.

3.1 Check in a customer

1. Go to **Operations** → **Visits**.
2. Click **Check In / New Visit**.
3. Enter the customer name (and phone). If the customer is a **member**, choose the member — their name and phone are filled automatically.
4. Save. The system creates a visit with a number such as **SPA-000145** and status **checked_in**.

Business rule: a visit may belong to one appointment. If a member's appointment already has a visit, the system returns the existing one.

3.2 Assign a therapist

1. Open the visit.
2. Choose **Assign Therapist**.
3. Select an **active therapist** from the list.
4. The visit moves to **assigned** and shows the therapist's name.

3.3 Start the treatment

1. Click **Start Treatment**.
2. The visit moves to **in treatment** and the start time is recorded.

3.4 Record services used

1. Click **Add Service**.
2. Pick a **service** from the catalogue and enter the **quantity** (e.g. Swedish Massage × 1).
3. Repeat for every treatment performed.

Services can only be added after a therapist is assigned and the treatment has started.

3.5 Finish the treatment

1. Click **Finish**.
2. The visit status becomes **finished** and the finish time is recorded.
3. The system generates a **draft Service Order** (number such as **SO-SPA-000001**) with a snapshot of all services and quantities.

3.6 Print the slip

1. Open the service order.

2. Click **Print**.
3. An 80 mm (or 58 mm) thermal slip prints showing:

```
SERVICE ORDER (DRAFT)
Visit No : SPA-000145      02 Aug 2026 14:32
Customer : Ruth Desta
Therapist: Hana Bekele

-----
Swedish Massage 60min    x1
Moroccan Bath          x1
-----
Total items: 2
Please take this slip to the cashier.
```

The slip contains **no prices** — pricing and payment happen at the cashier in the POS application.

3.7 Hand to the cashier

1. Click **Hand to Cashier**.
2. The visit and order both move to **handed_to_cashier**.
3. Give the printed slip to the customer, who hands it to the cashier.

3.8 Cancelling a visit

- If a visit must be cancelled (before finishing), choose **Cancel**. The visit status becomes **cancelled** and can no longer accept treatment changes.

4. Customers

4.1 Register a member

1. Go to **Membership** → **Member Registration** (or **Customers** → **Customer Profiles** → **New**).
2. Enter **Full Name**, phone, email, ID number, address.
3. Choose a **Plan** (optional) and **Start Date**.
4. Save. A customer code such as **MEM-007** is generated automatically.

4.2 Find a customer

- Use **Customers** → **Customer Profiles** and type in the search box. Search works on name, code and phone.
- Open a profile to see contact details, plan, status and visit history.

4.3 Medical records & loyalty

- **Customers** → **Medical Records**: record allergies, conditions, consultations and follow-ups per customer.

- **Customers** → **Loyalty**: assign a tier (bronze/silver/gold/platinum) and track points.

5. Membership

Task	Where	How
Create a plan	Membership → Plans	Name, type (spa/gym/cafe/general), duration days, max members, active.
Renew a member	Membership → Renewals	Open the expiring subscription and extend the end date.
Freeze / transfer	Membership → Freeze / Transfer	Choose request type, effective date, reason.
Issue digital card	Membership → Digital Cards	Add an RFID card (UID, type, expiry). Statuses: active/inactive/lost/expired.
Issue QR pass	Membership → QR Access	Pass type, expiry, max uses.
Day ticket	Membership (classic) → Day Tickets	Issue a one-day ticket for a guest.

Member status

- A member is **active** while today is within their start/end dates, and **expired** afterwards. Renewals extend the end date.

6. Appointments & bookings

1. Go to **Operations** → **Appointments** (or **Spa** → **Bookings**).
2. Click **New Appointment**.
3. Enter the customer/member, room or facility, service, start time and end time.
4. Save. The appointment can be converted into a visit at check-in.

7. Gym

7.1 Trainers

- **Gym** → **Trainers**: add trainers with specialties, certifications and commission rate. Statuses: active / on-leave / inactive.

7.2 Workout plans

- **Gym → Workout Plans:** create a plan per member — goal (strength, weight-loss, mobility...), start/end dates, sessions per week, exercises. Statuses: draft/active/paused/completed/cancelled.

7.3 Fitness assessments & body measurements

- **Gym → Fitness Assessment:** record fitness level, resting heart rate, blood pressure, body fat.
- **Gym → Body Measurements:** weight, height, chest, waist, hips. **BMI is calculated automatically.**

7.4 Classes

- **Gym → Classes:** schedule a class with trainer, location, start time, duration and capacity.
- Status is **derived automatically**: `scheduled` → `open` → `full` as enrolment reaches capacity.

7.5 Gym attendance

- **Gym → Attendance:** record member check-ins/check-outs at the gym.

8. Spa catalogue

Page	Purpose
Spa → Services	Treatment catalogue: name, code, category (massage/facial/body-treatment/wellness/beauty/other), duration. Status: active/inactive.
Spa → Therapists	Therapist profiles: specialties, certifications, commission rate.
Spa → Treatment Rooms	Rooms/facilities used by appointments.
Spa → Packages	Package offers.

9. Inventory

- **Inventory → Products / Consumables:** maintain items with quantity and reorder level.
- **Stock status is automatic:** `in-stock` → `low-stock` → `out-of-stock`.
- **Inventory → Stock Usage:** record what was consumed by services/visits.
- **Inventory → Suppliers:** supplier contact details.

10. Towel management

1. Go to **Operations → Towel Management**.
2. Issue towels for a visit: towel type (bath/hand/face/robe/other), quantity, issued at.

3. When towels come back, record **quantity returned**.
4. Status is derived automatically: `issued` → `partially-returned` → `returned` (Or `lost` / `laundry`).

11. Staff & facilities

- **Staff** → **Employees**: staff profiles (name, role, contact).
- **Staff** → **Schedules**: shifts per employee.
- **Staff** → **Commission**: base amount + rate % → commission amount is calculated automatically.
- **Staff** → **Performance**: periodic ratings.
- **Facilities** → **Rooms / Lockers / Equipment / Maintenance**: facility register and maintenance tracking.

12. Reports

All reports share the same screen:

1. Pick a report from **Reports** menu: Membership, Attendance, Service Orders, Therapist, Trainer, Inventory.
2. Set the **date range** (from / to) and click apply.
3. Read the summary cards and the data table. Use the export/print button to save.

Report	What it shows
Membership	Total/active/expired members, plan performance, subscription activity.
Attendance	Check-in volume, active visits, trends.
Service Orders	Draft/printed/handed-to-cashier volume and item counts (no financials).
Therapist	Treatments per therapist, service usage, completion.
Trainer	Classes and member activity per trainer.
Inventory	Stock position, low-stock items, usage.

13. Administration (admin role)

13.1 Users

1. **Settings** → **Users**.
2. Add a user with name, email, role and active flag.
3. Deactivate leavers instead of deleting where possible.

13.2 Roles & permissions

1. **Settings** → **Roles**.
2. Open a role and toggle permissions per resource group: **View / Create / Edit / Delete / Approve**.
3. Save. Changes apply immediately.

13.3 System settings

1. **Settings** → **System**.
2. Edit company name, address, phone, email and **currency**.

13.4 Notifications

- The bell in the header shows unread notifications; mark them read as you review them.

14. Platform administration (super admin)

- **Platform** → **Companies**: create/manage tenant companies and enable modules.
- **Platform** → **Demo Licenses**: issue licenses with expiry dates.
- **Platform** → **Audit Logs**: review every action (user, table, old/new values, IP, time).
- **Platform** → **Admin Dashboard**: platform overview.

15. Tips & troubleshooting

Situation	What to do
"A company is required"	Only a super admin can work without a company; target an explicit company.
"Active therapist not found"	The therapist must exist and have status <code>active</code> .
"Start the treatment before recording services used"	Assign a therapist and click Start Treatment first.
"This visit is already closed"	Closed visits (finished/handed off/cancelled) cannot be edited; create a new visit.
Slip does not print	Check the printer is selected in the browser print dialog and set to 80/58 mm thermal.
Wrong language	Use the language switcher; it applies immediately.
Forgotten password	Ask your admin to reset/update the user's password.
Missing menu items	Your role may not have the permission — ask your admin to review Roles .

16. Glossary

Term	Meaning
Visit	A check-in that tracks a customer through treatment (SPA-#####).
Service order	Draft, non-financial slip of services handed to the cashier (SO-SPA-#####).
Member	Registered customer with a membership plan/card/QR pass.
Rate card	Configured price of a service/session/pass.
ETB	Ethiopian Birr — default currency.
RFID card / QR pass	Member access credentials for gates/gym.
